Proof of use of Replit

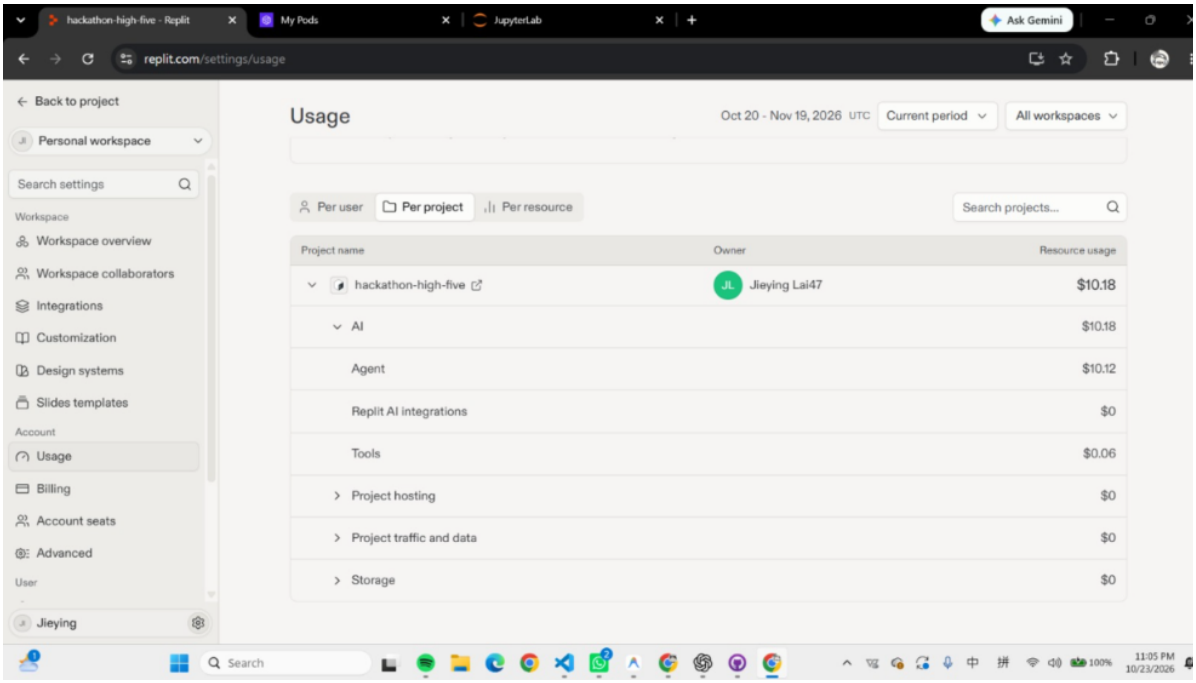

To improve our application's **mobile responsiveness, dashboard layout, and browser testing**. The AI Agent helps identify and fix UI issues, optimize layouts for different screen sizes, and test application functionality to ensure a smooth user experience.

In order to improve mobile responsiveness and optimize the application layout. The AI Agent identifies and fixes overlapping UI elements, adjusts the interface for different screen sizes, and performs browser testing to ensure a smooth and consistent user experience

The usage of Replit

Replit resource usage dashboard, which allows us to monitor AI Agent usage and development costs. It provides a breakdown of expenses for AI-assisted coding, tools, hosting, and storage, helping our team track resource consumption and manage the project budget efficiently.
